THE ELEVATOR FOR EVERYONE

passenger⁴²

the elevator for everyone

passenger⁴²

Passenger.42 is the ideal elevator for private houses and shops. It perfectly matches with the installation environment and can adapt to a limited space, offering a high balance between design and easy use.

Compliance to Machine Directive 2006/42/CE This kind of elevator can be easily and safely controlled by anybody.

The cab doorless version, featuring the infra-red barrier and the manual push button, respects all the standard regulations and is ideal to overcome architectural barriers.

The version with internal cab doors is more complete and allows the use of the elevator with the usual automatic push button, commonly used for lifts.

L'ELEVATORE PER TUTTI

Passenger.42 è l'elevatore ideale per soluzioni abitative private o esercizi commerciali. Si integra perfettamente nell'ambiente in cui è installato ed è in grado di adattarsi a spazi limitati, offrendo un grande equilibrio tra estetica e semplicità d'uso.

Conforme ai rigorosi standard della Direttiva Macchine 2006/42/CE questo tipo di elevatore ha la prerogativa di poter essere comandato in assoluta sicurezza da chiunque.

Nella soluzione senza le porte interne di cabina, la barriera ad infrarossi unitamente alla manovra ad uomo presente, ne fanno uno strumento semplice ed ideale di adeguamento alle normative vigenti in merito all'abbattimento delle barriere architettoniche.

La soluzione più completa, con porte interne di cabina, consente inoltre l'utilizzo dell'elevatore con la tradizionale manovra automatica utilizzata per i comuni ascensori.

Call Operation

The elevator moves through a continuous pressure of the floor push button, in the cab doorless version, allowing the passenger to stop the lift anytime immediately, or, in the cab door version, through a short pressure of the same push button, as for common lifts.

This guarantees a high safety within the cabin.

The same operations, can be realized through a touch screen display replacing the pushbuttons.

SISTEMA DI CHIAMATA

Nella versione senza le porte di cabina, il movimento dell'elevatore può avvenire attraverso una pressione continua del pulsante relativo al piano di destinazione, consentendo in questo modo di interrompere istantaneamente la corsa da parte dell'utente.

Nella versione con cabina dotata di porte, come per gli ascensori tradizionali, il movimento si attiva attraverso una breve pressione del pulsante stesso.

In entrambi i casi si garantisce la massima sicurezza per i passeggeri.

È inoltre disponibile come optional un display touch screen in sostituzione dei pulsanti.

Doors PORTE

P01. Sheet steel door with printed or transparent glass dim. 100x1200 cm.

Porta in ferro con vetro stampato o trasparente dim. 100x1200 cm.

P02. Sheet steel door with printed or transparent glass dim. 80x1000 cm.

Porta in ferro con vetro stampato o trasparente dim. 80x 1000 cm.

P03. Sheet steel door with printed or transparent glass dim. 220x1200 cm.

Porta in ferro con vetro stampato o trasparente dim. 220x1200 cm.

P04. Sheet steel door with printed or transparent glass dim. 100 x 600 cm.

Porta in ferro con vetro stampato o trasparente dim. 100x600 cm.

P05. Aluminium door, panoramic glass printed or transparent with wrought iron decorations.

Porta in alluminio, vetro panoramico stampato o trasparente con decorazioni in ferro battuto.

P06. Aluminium door, panoramic glass printed or transparent, wood effect coating

Porta in alluminio, vetro panoramico stampato o trasparente, esecuzione finto legno.

P07. Panoramic door with transparent glass panel.

Porta panoramica con anta completamente in cristallo trasparente.

P08. Stainless steel coated sheet steel door with panoramic glass.

Porta ferro rivestita in acciaio inox con vetro panoramico.

P09. Sheet steel door with panoramic glass.

Porta in ferro con vetro panoramico.

P10. Iron door without glass panel.

Porta in ferro cieca.

P11. Automatic RAL painted sheet steel door.

Porta automatica in ferro verniciata RAL.

P12. Automatic full glass panel door.

Porta automatica in cristallo totale.

P13. Automatic Glass door with satin stainless steel frame.

Porta automatica in cristallo con intelaiatura in acciaio inox satinato

P14. Automatic Skinplate door.

Porta automatica in skinplate.

P15. Automatic full glass panel door studs.

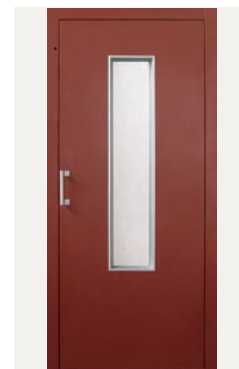

Porta automatica in cristallo totale con borchie.

passenger⁴² belt

Passenger 42 belt is the most innovative solution on the market for passenger elevators.

The suspension means for ropes polyurethane coated ensures maximum comfort by reducing most of the available space.

The drive VVVF coupled to a permanent magnet motor of the latest generation with 98% efficiency, allow to better manage consumption containing them to values comparable to those of a lighting system of medium power. The total absence of space for machinery outside the shaft (MRL) complete Passenger-42 belt making it by far the best elevator.

Passenger 42 belt rappresenta la soluzione più innovativa presente sul mercato per elevatori.

la sospensione mediante funi di trazione rivestite in poliuretano assicurano il massimo del comfort riducendo al massimo gli ingombri.

L'azionamento VVVF accoppiato ad un motore a magneti permanenti di ultima generazione con efficienza pari al 98%, permette di gestire al meglio i consumi contenendoli a valori paragonabili a quelli di una sistema di illuminazione di media potenza.

La totale assenza di ingombri per i macchinari esterni al vano di corsa completano Passenger-42 belt rendendolo in assoluto il migliore elevatore.
